GLO BRITE® SAFETY TRACK® PHOTOLUMINESCENT Non-Slip

This is the ultimate non-slip egress tape. Sudden power outages or natural disasters can increase the potential for panic, as well as the risk of injuries caused by slips and falls. Glo Brite®/Safety Track® is the perfect safety grade glow-in-the-dark solution for marking stairs and corridors that are part of the emergency egress route. Manufactured with the same aggressive adhesive system as our other safety tape products, Glo Brite®/Safety Track® Photoluminescent Non-slip will adhere to most clean, dry, oil-free surfaces. Make this anti-slip/photoluminescent product part of your low-location egress system.
